THE NAVY LEAGUE OF CANADA

VALUABLE WORK BEEN ACCOMPLISHED FOR WIDOWS & ORPHANS

Rallying to support the Navy League of Canada in its work of assisting widows and orphans of the Merchant Marine and their dependents, maintaining Sailors' Homes and Institutions in our leading Canadian ports from coast to coast and looking after the welfare of the seamen when ashore; training boys and young men and helping to make better Canadian citizens of them; the citizens of Nobleford subscribed \$8.50, Barons \$12.00, Carnagay \$6.75, Champion \$9.75, to this cause in a recent campaign conducted by Fred Cooke, organizer of the Alberta Division, 1107, 15th Avenue West, Calgary, Alberta.

October 18th, 1938.

LOCALS

Dr. and Mrs. Freeze were Calgary visitors Saturday.

Ernie Luchia of Nobleford was a visitor in town Sunday.

Mr. and Mrs. H. T. Lamont visited friends in Nanton on Sunday.

Dick Latif returned Tuesday from Calgary, where he spent several days.

Mr. and Mrs. Harry Smith were visitors in Calgary during the weekend.

Mr. and Mrs. Ted Davis of Lomond were Sunday visitors in town.

Miss Allegra Rompaul of Lethbridge is a guest at the home of Mrs. M. Mann.

Mr. and Mrs. A. Baker and Caroline were visitors in Calgary last week.

O. Millin will move into the house owned by Granlin and Renaldi, next week.

F. Gottenberg entertained at a stag party on Friday evening last.

Visiting from Nanton, Mrs. J. G. McKie is a guest of Mr. and Mrs. H. T. Lamont.

O. Castator has had the exterior of his house painted this week.

Art. Ulrich has been successful in catching seven coyotes in the past two weeks.

Mr. and Mrs. D. D. Farmer returned Saturday from a two-weeks' holiday in Minneapolis.

Special - Turkey Dinner every Sunday at the Koffey Shop. Come in and try our excellent home cooking.

After spending three weeks hunting in the district, C. Hogg of Cle Elum, Wash., returned to his home last week.

Mrs. B. McDonald is a patient in the Colonial hospital, Rochester, having been operated on for goitre on Monday.

The office formerly occupied by G. K. McLean has been taken by W. Harris for a radio show room.

Ed. Griffin was a business visitor in High River the beginning of the week in connection with the irrigation project.

The Champion Ladies' Social Credit Group will meet at the home of Mrs. Dawson, Tuesday November 1st, at 3 p. m.

Mrs. Sarah E. E. McLean of Reid Hill was a visitor in town Wednesday, and paid a friendly call at the Chronicle office.

Mr. and Mrs. L. V. Stout have returned from their honeymoon. Mrs. Stout remaining in Lethbridge until their home here is ready.

Note: K. R. McLean, Optometrist and Optician, of Calgary, will make a special trip to Champion Wednesday morning, November 2nd.

The Claverville Pioneer Club is sponsoring a Public Dance to be held on Friday, Nov. 4th, with Old Time and Modern Music. The music will be supplied by a number of orchestras competing for a \$15.00 prize.

LOCALS

Mr. and Mrs. C. G. Taylor and Shirley visited at Arrowwood on Sunday.

Mr. and Mrs. Arnold Fraser, and Mrs. Jim Bell, of Granum were visitors in town Wednesday, guests of the former's sister, Mrs. M. Mann.

Word received from Mrs. A. W. Jopling states that Mr. Jopling is a patient in the Colonial hospital, Rochester, where he is receiving treatment.

Mrs. M. Cemelini and family visited in Fernie on Sunday and Monday. They were accompanied by M. F. Hamilton, who also visited in Kimberley.

Arriving from San Francisco Monday evening, Mr. and Mrs. W. Henderson are guests of the home of the former's brother, J. D. Henderson, and Mrs. Henderson.

Virgil Stout, accompanied by a sister from Lomond and a brother from High River, left yesterday for Coeur d'Alene, Idaho, owing to the serious illness of his father, L. E. Stout.

Coming next week, the finest musical show of the year - "Yip! A Singsong!", with Alice Faye and a splendid supporting cast. Good comedy. Six new song hits. This is really a swell show. Community Hall, Wednesday, Nov. 2, at 8 p. m.

W. Isaacson, Ralph and Miss Jayne Isaacson and Miss Joy Pieppgrass left today for Montana, where they will spend a few weeks. From there Miss Jayne Isaacson will go to St. Anthony, Idaho, to spend the winter with her aunt and study music.

The attendance at the meeting of the badminton club Monday evening not being sufficient, election of officers for the coming year was postponed till later date. It was decided to open the season November 1st (the fee to be \$5.00). The club is looking forward to an active season.

The home of Mrs. W. R. McRae was the scene of a delightfully arranged party last Friday evening, when Mrs. McRae and Mrs. E. Caldwell entertained at a nine tables bridge. Prizes were won by Mrs. J. O. Bell, Mrs. G. L. Dupue, Miss Ivah Miller and Mrs. C. McLean. The travelling prize was awarded to Mrs. W. A. McIntyre.

BLUE GRAMA GRASS

Blue grama grass is one of the most important native grasses found on the short-grass prairies of southern Saskatchewan and Alberta. Originally a native of the high tablelands of Mexico, blue grama grass has extended its range to the more northern regions of the United States and Canada. Although it is often called "buffalo grass" the true buffalo grass is not found in Canada and does not come further north than southern Montana and the Dakotas.

CARNIVEROUS PLANTS

Most plants in Canada obtain the nitrogen necessary for their growth from the soil, but there are three families of Canadian plants which utilize the bodies of small animals for this purpose. These carnivorous plants include the sundews, the butterworts and bladderworts, and the pitcher plants, or side saddle flowers.

THE WORLD OF WHEAT

By H. G. L. Strange

"I don't believe this Thatcher will stand up. In a few years the rust will get it."

"Why do you think that?" I said to my friend John Skeptic. "Well," he said, "Ceres was boosted to the skies to resist rust, and you will remember that after a few years it had no more rust-resistance than Marquis, so I guess Thatcher will go the same way."

"For my part, John," I said, "I think you're badly mistaken. In the first place Ceres was not bred as a rust-resistant wheat, and it never had been tested by the plant breeders against rust. It simply had been found, under very mild rust epidemics, to have a little better resistance than Marquis."

"Thatcher on the other hand is an entirely different thing. It was bred by some of the ablest plant breeders in the world, specifically to resist wheat stem rust. It was tested in a most rigorous way for years in the Laboratories against all the forms of rust that are known, and on the farms it was not harmed by the very severe stem rust epidemics of this last year."

Plant breeders all say they will be greatly surprised if Thatcher is ever damaged by the present forams of wheat stem rust."

Following factors have tended to raise price - Australia outlook becomes more serious owing to hot winds. Complaints of deterioration increase - Some talk of further inflation of money by U.S.A. - India buys more wheat - Some frost reported in Argentina - Possibilities of broad and active demand for barley in Europe.

Following factors have tended to lower price - European rye harvest largest since 1933 - Excessive surpluses of wheat corn and rice in the U.S. - Australia ships corn to Canada - France sells wheat to Italy on barter basis - Due to record wheat crop all grain or flour imported into Finland must contain a domestic mixture - Manchurian soybean supply above last year.

Renew your old hobbies, and develop new ones that attract you. Keep abreast with the affairs of the day. There are lectures, classes, books on any subject that you might care to delve into. Show an interest, too, in the hobbies and friends of your family. Remember, too, that at first your actions may be received with the same amused affection, but as your interests and friends increase, so will the respect of your family. You will be a friend and companion, and as such they will know you and rely on you, just as you will.

ESSENTIAL ELEMENTS

The three "essential" elements of fertility are nitrogen, phosphoric acid and potash. These elements have a received this name, not because they are any more essential to the growth of crops than the other nine or ten elements entering into the composition of plant tissues, but because they are the three elements which must be constantly returned to the soil if its productivity is to be maintained under ordinary systems of farming.

The Plight Of Youth

The phenomenon of young, unemployed men in large numbers wandering aimlessly all over the country in the past two or three months, some of them honestly looking for work and others professing searching for jobs but hoping to avoid them, has been termed, and not without warrant, a "national disgrace."

There cannot but be sympathy for these youths. Many of them are offering of thrifty, hard-working parents. Many of them are fairly well educated, some even holding university degrees. Some of them are well equipped to occupy an honored place in the business and social life of the country and have the right attitude towards work, but they find that industry does not want them, has no place in its crowded ranks where they can fit in.

On the other hand, the ranks of these idle, footloose youth include some who are more shifty than thrifty, some who prefer to shirk rather than work, and some who are outright nevers and ne'er-do-wells. Unfortunately, in the minds of a section of the general public, there is an inclination to include all of them in the latter category, and this tends to make the lot of those who are willing and eager to work and who are unable to do so through no fault of their own, harder to bear.

Unless something is done to enable these young men to find their place in the social and business life of the country, and particularly those who by upbringing, education and inclination are worthy material for citizenship, their ultimate fate is difficult to predict, beyond the general statement that it can hardly be expected to be creditable for themselves, their forebears or their country.

Action Is Needed

As stated at the outset, one cannot help but be sympathetic towards these youth and grieved at the predicament in which they find themselves, but sympathy alone is not sufficient. Sympathy must be translated into practical action if mental, moral and physical disaster is not to be the goal towards which they press. In other words, a helping hand must be extended, not by private effort, by the governments of the country.

On the face of it the problem seems insoluble until such time as industry has sufficiently recovered from the slings and arrows of misfortune to enable it to absorb them. The only other solution, temporary or otherwise, is for the governments of the country to do something more than is now being done.

It will be argued, of course, that in the west, the federal government has made some provision to take care of these benighted youth by establishing the farm bonus plan and in providing the funds for the operation of youth training classes in the larger centres.

The former has and undoubtedly will again be of some assistance in aiding unfortunate youths but the farm bonus plan, after all, is only a seasonal and very temporary measure. It takes care for a few months of the year of one class of the unemployed young men and only a percentage of the total. Moreover, it does not ordinarily train for or lead in the direction of permanent employment for the great majority of its beneficiaries.

The youth training project, too, has undoubtedly merits. The educational opportunity it affords is excellent and unquestionably those who attend these classes and pursue their studies with diligence, thereby better equip themselves to occupy a place in industry if and when the opportunity to do so appears, but unfortunately it does not, at present, lead to self-support, the national ambition of every right-minded youth.

Abundant Opportunity

All that youth training does, as yet, is to increase the number who are equipped to compete for the few vacancies that occur in industrial life at a period when trade and commerce, using the term in its broadest sense, has not emerged from the doldrums.

Until such time as industry is able to more adequately provide for the needs and ambitions of the youth of the country it would appear that the only thing for the senior governments to do is to make some provision to enable youth to give vent to its energies in the natural and proper manner through work, and this can best and most profitably be done through the development of the vast natural resources in which the country abounds.

One could list a number of projects which might be undertaken, the prosecution of which would restore more normal and physical vigour to disappointed youth and at the same time yield some return to the taxpayers who would have to foot the bill. It is hardly necessary to enumerate such development possibilities. One has only to look around and see the opportunities.

There is plenty of work of a beneficial nature to be done and there are plenty to do it. Why not connect the two?

Had Night Answer

"James," said the teacher, "come in front of the class and spell 'neighbor'!" and he did so correctly.

"That's quite right, James," said the teacher. "Now, Tommy, it's your turn. Please tell me what a neighbor is."

After a pause, "Please, miss," said Tommy. "A neighbor is a woman who borrows things."

Wrong All Around

"Wrong Way!" Corrigan still casts his shadow.

A conductor on a Canadian National Railway, en route east in New Brunswick was making his rounds when he discovered that a passenger had not only had a Canadian Pacific Railway ticket but was bound for Vancouver, B.C.—exactly in the opposite direction.

France Gets More Showers

France and other parts of western Europe receive less rain than the eastern United States, but since the showers are lighter and more frequent, less water is lost by draining than in this country, where more sunny days and harder rains are more common.

During the gold rush in Alaska, breakfast sold for \$48 a pound at Circle City.

Berlin has four thousand five hundred and fifty-three American residents.

Campaign For Conscription

Preparations In Britain To Be Ready In Event Of War

Sir Auckland Geddes, war-time minister of national service, appealed for the re-establishment of a government office similar to the one he held during the Great War, to ensure mobilization of the population for a total war within a few months after the outbreak of a new conflict.

In a letter to The Times, Sir Auckland suggested submission of a simple questionnaire to all British voters to determine their reaction to his proposal, which received the official support of The Times.

Viscount Rothermere's Daily Mail intensified its efforts to obtain replies from readers to a questionnaire asking: "Are you in favor of obligatory military service or organization of a volunteer service?"

Lord Beaverbrook's Daily Express also continued its campaign for conscription of the nation's economic resources. Beaverbrook, citing a statement of Frank Fehr, president of the Baltic exchange, one of the world's greater grain markets, was in favor of conscription of men for the army and also for industrial and commercial enterprises.

Lord Fehr said that the Baltic exchange were disposed to see their entire organization placed at the disposition of the government.

Something New In Food

Ginger Bread With Buttermilk Said To Be Fine Combination

The columnist of the Baltimore Sun, writes one of his contemporaries, the other day remarked that he found what he called an unusual food combination recently—buttermilk and ginger bread.

That is a food combination the origin of which would be hard to determine," says the columnist, "but I think it was a very popular combination constantly indulged in on the eastern shore of Maryland from time immemorial. The habit, probably drifted down from Pennsylvania, for in every lower Pennsylvania home it is considered one of the best food combinations there ever was."

"In Carroll county no farmer's wife would think of offering you buttermilk without a slice of ginger bread with it—and if ever there was a combination that could charm away the torments of a hot day it is a glass of buttermilk right cold out of the springhouse and a hunk of ginger bread made by the recipe that descended to Maryland from Pennsylvania. Try it some time on a hot day after a long, tiring walk."

SELECTED RECIPES

MAIMALADE SAVANNAH

1 package Corn Meal
1 1/2 cups hot water
1 1/2 teaspoon salt
1 cup butter
1 1/2 cup orange marmalade
Dissolve corn meal in water. Add salt. Chill until cold and syrupy. Fold in cream, whipped only until stiff. Add marmalade. Chill until slightly thickened. Serve with cream. Or, chill until firm. Unfold. Garnish with whipped cream and additional orange marmalade. Serve etc.

CANDIED COTTAGE ROLL

4 lbs. cottage roll
Boiling water
1 cup sugar
1/2 cup mustard
Egg cracker crumbs
Whisk whole
1 1/2 to 2 cups Bee Hive Golden Corn Syrup
Simmer cottage roll in gently boiling water until tender. Cool in the liquid in which it was cooked, then in liquid. Remove strings. Place cooked cottage roll on rack in roasting pan. Smooth mustard to a paste with vinegar, and spread over fat surface of roll. Cover with sifted cracker crumbs, coarse in diameter and centre of the roll with a clove. Pour corn syrup carefully over the surface. Bake in a hot oven, 400 to 450 degrees, to reheat meat and to glaze surface. Bake carefully one hour during cooking with liquid in pan.

The English Translation

A Chinese landed in England for the first time. At Dover an official asked him his name.

"My name," replied the Oriental. "The customs officer stated hard at him, 'What is that your native name?'"

"No," The Chinese shook his head. "I had it translated into English."

"And let's have your native name," persisted the officer.

"Ah Choo It," replied the other.

Not What He Wanted

Bruno Anton, earning \$5,000 a year as chef in a London West End restaurant, was an ardent Nazi chief in London, but the last thing he really desired was to return to Germany. The other day he was recommended for deportation to his Fatherland.

Istanbul, Turkey, may ban names for streets and substitute numbers.

Outspeeds Howitzer Shell

Eytton Believes His Record Of Value To Car Designing

Captain George E. T. Eytton, who set the land record of 307.4 miles an hour in his seven-ton automobile Thunderbolt, told some 200 members of the Downtown Athletic Club in New York about travelling faster than the shell of a field howitzer.

Introduced by Captain E. V. Rickenbacker, chairman of the contest board of the American Automobile Association, which timed Captain Eytton's runs on the Bonneville Salt Flats in Utah, and president of Eastern Air Lines, the British speed driver said that he believed record-breaking in specialized machines was of great value to the advancement of general automobile design from the points of view both of safety and efficiency.

"It is able to withstand six miles a minute," he said, "prove that tires can be built which will not blow out at ordinary road speeds. Finer steels and lighter aluminum alloys are the precise workmanship which go into the construction of such a machine as the Thunderbolt with its 4,000 horsepower inevitably mean advances for the motor car intended for the average driver."

Although his howitzer machine was started by being pushed by a truck just to get the huge engines turning over, and how the change was made from second gear to top gear at a little over 200 miles an hour, Captain Eytton said that when he did not attain its top speed of the eight 48-inch wheels were revolving forty-five times a second. Speed reached, he added, 560 feet a second, compared with 700 feet a second for the bullet of a .45 calibre revolver and about 400 feet for a howitzer shell.

"That was the run," he said, "Thunderbolt gave off a streamer of black smoke about three and a half miles long. It passes the timing observers with their electric eye simply as a 'swish.' Sound of its passing follows about half a mile behind the machine."

Something Really New

Paper Pillow Cakes Protectors

On Cuddles To Featherbeds
Here's another wrinkle for keeping down washing. The New York Herald-Tribune tells of something new in houses, the housewife's dream come true, in short:

"Did you know that you can have pillow cakes for as little as 10 cents apiece, if you'll use paper ones? They are as soft as face tissues but heavier and stronger. We have actually slept on them the same one for a full week. These paper pillow cakes really came to light as a protection for those unfortunate allergic to feathers. No other or dust particles from the pillow itself can penetrate through them. But many a person not allergic to feathers will welcome them for night when an extra layer of face cream or an all-night sleep treatment warrants special pillow protection."

Old Castle Wall Found

The foundations of a wall believed to be 600 years old were discovered by workmen digging a trench to lay pipe to the guardroom of Windsor Castle. It is more than five feet thick, and the brickwork is in excellent preservation. It was drilled through with difficulty.

How Kangaroo Was Named

The kangaroo was named through a misunderstanding. In 1770, Captain Cook asked a native the name of the animal and the native replied "kan ga roo," meaning "I don't understand." Cook thought it was the name of the animal.

There are 3,300 species of fish in the waters of North America.

A barrel cactus is more than 90 per cent water.

Oil On Ocean Bed

Canadian Coal Seekers Have Found Petroleum 2,000 Feet Down

What is believed to be the first submarine oil bed in the world has been found at Inverness, Nova Scotia. A diamond core seeking new coal seams in a government-operated colliery came across flowing oil a mile beneath the surface and 2,000 feet vertically below the sea surface. The crew had penetrated 233 feet horizontally before the oil was struck. It was found in their fluid dips of oil and water.

Confirming the find, Dr. Alan Cameron, provincial deputy minister of mines, said: "We're going to carry the drill hole further, through the geologist and engineers. There are definite showings of oil. If it is petroleum, it will be hard to get it out."

Baby Panda Likes Frost

Pet At Chicago Zoo Does Tricks Only On Cold Days

Mei-mei, the Chinese baby panda, was a disappointment to Brookfield Zoo authorities in Chicago because she would not play up to her public like her predecessor, the late Su-Lin. Then came the season's first really cold day, and so on in fact that the pandas hunched themselves instead of going to the zoo—and Mei-mei showed her first interest in playing and people. Mei-mei frisked and rolled, climbed and wiggled her nose at the over-voiced spectators, while nearby baby gorillas went in to huddle and shivered.

Assistant Director Robert Bean is trying to figure out how to get Mei-mei and the public on an equal interest basis.

A Freak Potato

Ohio Woman Has One Displaying Human And Animal Faces

A freak potato, weighing two pounds and consisting of three branches, was found by Mrs. Marie Davis of Toledo, Ohio, in a bushel of potatoes she received from her sister's farm. One of the potato's branches resembles an old woman with a bunch of hair knotted on the back of her head, and, turned at another angle, shows the likeness of a human face. Another branch looks like a rhinoceros' head and a third branch like a human face looking down.

Spagnoli's first coffee house was opened in St. Michael's Alley, London, 1622.

It is possible to see an eclipsed moon while the sun is visible.

NIGHT COUGHING CAN OFTEN BE PREVENTED

If your child often coughs at night or even a slight cold—do this at bedtime: Thoroughly massage Vicks VapoRub on throat, chest, and back. VapoRub's powerful vapors act to keep the air-passages clear helping to maintain normal breathing through the nose, and so reducing needless night coughing. Try it tonight—learn for yourself another reason why VapoRub is a family standby in more homes than all other medications of its kind put together.

POOR MAN'S GOLD

Courtney Ryley Cooper

© Courtney Ryley Cooper.

WNU Service.

CHAPTER VI.—Continued

Hammond began to file the ragged edge of a long-handled shovel. "Don't you think it's up to us to get as much gold out of that creek place as we can? We'll have to be hiring men soon."

The older man shot him a quick glance. "That's the fourth or fifth time you've brought that up," he said.

"Well," asked Hammond, "Didn't we talk it over the other night?"

"We didn't come to any decision."

"That doesn't make two of us."

A certain asperity had grown up between the two; looking back, Hammond felt that McKenzie's own nature had become steadily sower ever since the first arrival of Timmy Moore's airplane and its passenger.

Jack had resented that, as though it were an implied insult to the girl he loved.

"You can't have that. I'm convinced that the old river will flow over toward the British Columbia hills," he chuckled. "I wish it were the other way around—all my claims are in the other direction."

Hammond grinned. "Well, you can't say I didn't tell you."

On you're talking about that stuff that came from Jeanne Towers. I've added to that a great deal—on the chance that somebody around here would want it. But everybody's looking the other way. Just as well. I'm willing to turn over some worthless claims to an English syndicate."

"That's beyond me."

"Something I took over out of what Jeanne left me."

"You guess the house is crooked. They say frankly they probably won't devalue the property. They just want something clean in a live mining camp."

"A stock-selling scheme, probably."

"I haven't much doubt about it. It's glad to have the thing over."

"So would I," Hammond felt he could share Kenning's repugnance.

He was freed these days with the thought of new gold, clean money.

The eagerness had been mounting for some time when Kenning had told him her decision. To get gold for Kay—his hands clawed for gold, his mind was centered upon little else.

"How deep do you think we'll have to go to reach that old bedrock?"

"A lot deeper than you'd imagine."

"You mean a hundred or twenty feet. From my study of the strata, I can't see any other answer."

"I can't see any other answer."

"I can't see any other answer."

ONLY THE BEST

IS GOOD ENOUGH

This outstanding triumph is proof of quality. Twelve first prizes in two classes at the 1934 Baby Show at the Toronto and Ottawa Exhibitions, were won by babies fed on Crown Brand Corn Syrup.

What better evidence can there be of the confidence which parents have in the purity and quality of Crown Brand Corn Syrup?

A delicious table syrup. Crown Brand is a treat for the whole family.

Let the baby that pictures a famous hockey star on still life, be a baby that is healthy and happy.

Crown Brand Corn Syrup.

THE FAMOUS ENERGY FOOD THE CANADA SYRUP COMPANY PRODUCED

Hammond whistled. "That makes a lot of work."

"You bet it means work and men. And a concentrated campaign. Any other clearing in the next fifty years. You've got to spend money to make money in mining."

"That's what I've been trying to tell McKenzie Joe. But he—"

The good halted. Kay was coming down the hill. Bruce Kenning called good morning and went up the stream. Hours later, with Kay and Hammond watching intently, the workers began a clearing of the sluice box on the Joyce claim. It only revealed the usual flour gold, indicating a somewhat good mine, but as yet, nothing worth saying.

"Neither this flume nor the sluice is long enough," one of the workers complained. "Me 'n' Jim waste an awful lot of time just standing around, for the fear of shoveling in too much gravel."

"Then build 'em up now, while you're dried out for the clean-up."

Hammond turned to look at the sawmill. "I'll tell 'em to send some lumber."

"And nails," called Kay.

"I'll get 'em."

Hammond left the stream, with its lines of eager workers. At the sawmill he gave the lumber order, then turned for Jeanne's to get the nails. She met him, some fifty yards away, returning from the delivery of a batch of darning.

"Haven't sold all those nails?" he asked.

"I think there are some left. There's been a run on them this morning. Everybody in camp wants nails."

They reached the store and she lifted the peg from the hap—five pounds of nails. Kenning came over to close their doors. Then, pushing the door open, she walked into the store, suddenly to gasp and to hurry around the end of the rough counter.

The crudely built money drawer stood open. The girl wavered, staring at it, her hands half-raised, her jaw sagging. Then she said, in a quavering little voice:

"Somebody's been in the store!"

"Had you left your money here?"

Hammond asked sharply.

"Yes—all of it. I—I thought nobody ever bothers to look up—"

Hammond stared about him. It seemed inconceivable that crime should have entered this far-away place; Sergeant Terry's main work was growing a garden. Beside him, Jeanne Towers continued to stare blankly; it was as if she sought an explanation of the impossible, the supernatural.

"What would you want to steal my money?" she asked dazedly. "They took everything; the bills, and my money, and my gold."

Hammond did not answer. The door had begun to swing shut; the faint breeze therefrom was making a hissing sound as it passed over the door, and whistled it to the floor. Jack moved for it, but the girl with her eyes fixed upon him, she grasped it, turning it in her hand. Then, with a spasmodic movement, she crumpled it in a tightly clenched fist.

"It's nothing," she said. Her face was bloodless.

(To Be Continued)

Insects rely for protection from an approaching enemy on their speed and agility. They are usually near-sighted.

A glass may sometimes be broken by striking a loud sound of its own keynote nearby.

278

Facing the Future

Free Peoples Must Realize That They Have To Protect Their Liberty

The men in the British parliament who are demanding more armaments and greater production are the true guides of our future policy. The past is past. Our leaders have decided, for good or ill, not to regard the dismemberment of Czechoslovakia as a casus belli. It cannot be revised now, no matter how brutally Hitler's minions have treated the Czechs. The future, we may be very sure that the old Biblical rule still stands: "Whatsoever a man sows, that shall he also reap."

But we must face the future. One meets a lot of very brave men these latter days whose war has been finally averted who talk about what should have been done and said at Berchtesgaden and at Munich. They were not so brave when it looked as if war was actually coming. But all free peoples, including our verbally beligerent American friends to the south, should realize today as never before that they must be prepared to defend their liberties if they hope to continue to enjoy them.

Criticism from Canada at this time seems especially pointless. How ready are we to join the forces of the Lord and fight at another Armageddon? Not yet if we are not ready and willing to fight, we ought to begin to have the becoming modesty to keep our mouths shut!—Montreal Star.

Weather Lore

Expert Explodes Theory About Changes of Climate

St. Frederic, August, 24 years director of the meteorological service of Canada until his recent retirement, says all the talk about the weather changing due to the ages is just so much nonsense.

"I've been looking through the records of the Jewish calendar and the weather then was just about the same as now," St. Frederic said when reporters inquired about his "eighty-first birthday." "About 15 years ago I prepared a paper on 'Is the Weather Changing?'" and came to the conclusion that it was not. In records of 2,000 years there are evidences the climate in the Holy Land was not very different from what it is now.

There are "fluctuations or pulsations" every so often, he admitted, but the fluctuations of cold winters in the 1870's and a mild spell in the 1890's. The coldest period in the last 150 years was around 1815 and 1816.

St. Frederic was willing, too, to help explode the myth about the grounding and his shadow, the activity of squirrels and a big nut harvest doesn't mean it will be a cold winter and no one will ever be able to predict a satisfactory rain by watching the clouds with bombs, he added.

Should Not Be Specialized

McGill Principals Warn Against Too Many Clubby Holes In Education

St. Louis, Mo., Aug. 24.—The McGill Principals' Association, in a statement issued here today, warned against the specialization of knowledge, and the separating of it into clubby holes, was not the chief aim of education as given by Principal Lewis W. Douglas in his address at Montreal to the graduating class and other students of McGill at the University of the Pacific Convention.

Douglas maintained that specialization had been carried to such an extent that many were unqualified, by reason of the lack of possession of a broad cultural background, to hold that position, and urged his listeners to consider education as the process by which man interprets all the divisions of knowledge into a coordinated, integrated, unified conception of living.

The New Potatoes

Husseinets Can Now Have Choice of Several Colors

Husseinets who forever are trying to get something to harmonize with something else are now getting ideas on potatoes. The Pennsylvania State Department of Agriculture, thinking perhaps of the somewhat delicate upon a color scheme for the dinner table, is offering a choice of varieties. Red potatoes, pink potatoes, blue potatoes, white potatoes, yellow potatoes with blue eyes, whites with red eyes, and even purple potatoes that are purple all the way through—like a beet.

The stones and timber of some places have been made more valuable by copsa made hard sacrificed by thousands of women and girls.

Employs Only Men

No Women Have Ever Worked For Brighton Firm

There are no flowers on the desks of directors of the business controlled by A. R. T. Perry, decorators' merchant, in Brighton, England, and the south coast.

Why? Because, though Mr. Perry employs more than a hundred men in his showrooms, girl employees have been banned from the business hours of Perry for nearly 70 years—from the first day that Mr. Perry opened the shop in Duke Street, Brighton.

Boys answer the telephone, do all the typing, make the sauce tins. Men show women customers' round, and boys do all the office cleaning—even vacuuming flat under the taxi.

Mr. Perry won't have it that he is prejudiced against girls. He even admits that they can excel men in business.

For 25 years he has been a leader of the Brighton and Hove Battalion of the Boys' Brigade, and it is his ambition to give every boy a chance in life.

Certainly, a commanding officer or a captain of the battalion, he believes in the doctrine of "Give boys a chance."

His businesses are so organized that he claims no boy can find himself in a blind-alley job. All have a chance of going to the top.

My husband finds his type of business that he is lucky enough to carry on without women. But he likes to see them in the home," Mr. Perry says.

And Mr. Perry's employees? They are all men. The Duke Street branch said with enthusiasm: "We prefer it this way. We don't in the least miss the feminine touch."

They are happier without it. "A female can be a disturbing influence in business. Without her there is no question of 'Don't do that, dear, let me do it for you.'"

He has Huxley Huxley on the best deal. "It's for you get thrown back if one tried it."

Have Real Problem

Nova Scotia Fishermen Get Very Little For Hard Work

Three Nova Scotia fishery fishermen, after telling from daybreak to noon, landed 425 pounds of fish.

But Huxley Huxley on the best deal. "It's for you get thrown back if one tried it."

For the catch, the fishermen were paid \$3.25.

But the \$3.25 the fishermen had to deduct \$1.50 for delivery to market, leaving \$1.75 for three men's week, gasoline, bait, and upkeep of boat and gear.

Of the 425-pound catch, 324 pounds were sold to retail customers.

The fishermen paid for those 324 pounds of fish a total of \$30.20.

Unhappily paid about ten times the gross earnings of the fishermen.

Whether or not the circumstances in this specific case were exceptional, the fact of fishermen and prices paid by the consumer over a period of some weeks shows a very wide gap indeed—Maclean's Magazine.

Features Of The Future

New Architecture Will Be Seen At Coming World's Fair

A preview of the style of architecture to be exemplified in the New York World's Fair is provided by the lavish new metropolitan night club, the Riviera. Every interior wall curves on an arc, giving each room an illusion of far greater spaciousness. The main dining room, a huge oval of 6,000 square feet, belies the compact appearance of the building's exterior.

Other "features of the future" are a sliding glass wall 52 feet long, meeting stage, a revolving stage with colored floor lights, a revolving bandstand for orchestra changes, and sliding glass walls which drop at the loss of a switch and open the huge dining room to the Hudson River's breeze.

A heat metre so sensitive that it will record the effect of a bluish heat developed by engineers interested in the proper heating and ventilation of buildings.

A glow which was leaned against a tree on the Longfellow farm, near Exeter, Iowa, more than 10 years ago, still remains, firmly embedded in the tree's trunk.

Pike County, Ark., is the only place in North America where diamonds are found in any quantity.

Dancing, drinking, embracing and kissing are banned on the Japanese scene.

Britain is looking for the world bicycle trade.

HOLLOW'EEN NEXT MONDAY

Your boy and mine, and the girls of course, will be out Monday evening to celebrate.

Wouldn't it be a splendid idea before you start out to promise yourself that under no circumstances will you allow yourself to become an accessory in destroying private or public property.

There is ample room for plenty of good wholesome fun within the realm of the law. So here's hoping that you have a wonderful time with a minimum of casualties.

PART OF YOUR HERITAGE

Be informed, read a newspaper.

The Calgary Herald is running a series of briefs in this newspaper pointing out a few of the "good things" in life enjoyed by keeping abreast of the times by reading your newspaper.

The Calgary Herald needs no introduction to the people of Canada, which for over half a century has been an outstanding publication, bringing to the surface facts that make an informed public better citizens.

Morning Prayer will be said in Emmanuel Church at 11 a.m. Sunday, 30th October. Note the change in time.

Mrs. E. H. Mack of Claresholm, who has been visiting Mrs. O. L. Taylor for the past two weeks, returned to her home on Sunday.

Mrs. Melvin (nee Alice Simpson), and a baby daughter, is visiting in Westchester, Wash., at the home of her sister, Mrs. Mallory.

Mr. and Mrs. Donald Bond were Sunday visitors from Gleichen. Mrs. O. L. Taylor accompanied them home, where she will spend a few months.

Mrs. Frank Simpson, accompanied by her son and daughter-in-law, Mr. and Mrs. Bruce Simpson, left Friday to spend the winter in Long Beach, Cal.

Picture Show—"Three Smart Girls" starring Deanna Durbin. This is a splendid show that is well worth seeing. Carmangay Community Hall, Friday, Oct. 28, at 8 p.m. sharp.

E. Lazo and sons, Louis, Joe and Emerick, motored to Winfield Tuesday. The two older boys will remain there, Mr. Lazo and Emerick returning in a short time.

The Plainfield Social Credit Group will hold a meeting in the Plainfield School on Friday, November 4th. Hon. Peter Dawson will be the speaker. Lunch will be served. Time 8 p.m.

Mr. and Mrs. Tom Middleton, and daughters Edna and Mary, were Sunday visitors at the home of their daughter, Mrs. O. E. Reiter, and Mr. Reiter, at Iron Springs.

Joe Minty received burns on his hands, Sunday afternoon, when the gasoline in which he was cleaning his hands caught fire from the blowtorch that was accidentally turned towards him.

Miss Doris Hoyde was given a delightful surprise party at Finn Hall recently. Following games and dancing, the guest of honor was presented with a gift. Miss Hoyde, who is leaving to enter the Holy Cross hospital as a nurse in training, will be greatly missed by her young friends.

At a meeting held in Parker's Service Station Thursday evening, curling enthusiasts decided to repair the rink for this season. A proposition was made that the town would give them the old heavy barn but, as it would require around \$250.00 to tear down and rebuild it, it was not considered feasible to attempt to raise that amount at the present time.
